

What is Due and When?

All assignments are due by 11pm on Wednesday, October 4th

- Quiz 2
- Wk5 - Processes & Using VI

Watch, Read, & Do

- **Read:** The Linux Command Line
 - Chapter 10, Processes
 - Chapter 11, The Environment (*skim this, mostly informational*)
 - Chapter 12, A Gentle Introduction to VI
- **Review:** The attached PDF with a list of VI shortcuts all in one place.
- **Complete:** Wk5 - Processes & Using VI

Video Lectures

Managing Processes by Jason Wertz

- <https://www.youtube.com/watch?v=uVant1Licxl&feature=youtu.be>

Basic File Editing with Vi by Guru99

- <https://www.youtube.com/watch?v=pU2k776i2Zw>

Notes

- **Q: This is a lot of stuff to remember! How do Linux users and admins remember all of this information?**
A: They don't! You will start to remember the commands and tasks you perform over and over again like `ls`, `cd`, and `pwd`. For other items it is not important **how** to use the command but that you remember that there is a command that **can** perform the task you want. From there, you can use the man pages and Internet to figure out how to make the command work in the way you want. The most important skill for a Unix user/admin is to learn how to look up information and apply it when needed. Don't try to remember everything! Everybody uses the man pages on a Unix machine. It is expected and acceptable!
